Geology Today

Index 2005

Abhe, Lake
  able to respond to environmental change 103–4
  known for its travertine towers 104
Acanthopleuroceras 149
Acratocnus odontrigonus 234
Acratocnus simorhynchus 234
Afar people, adapted to their environment 101, *102*
Afar terrain 101–3
  Danakil Depression 102–3
  divided between warring nation 102
  flood basalts 102
  hostile hot barren desert 101, 102
  volcanism 102
Afar Triangle, extension tectonics 101–7
  the Afar terrain 101–3
  the Danakil Depression and Erte Ale 106–7
  grabens of Djibouti 103–4
  patterns of plate movement 104–6
    most of extension taken up by magmatic emplacement 105
Affara Granite 106
Afrera, Lake, fed by geothermal springs 106
African Plate, breaking apart 101
agate 60, 62
Aggregates Levy Sustainability Fund 210–11
Agricola, Georgius, *De Naturum Fossilium* 62
Alexandria, schools of Healers 60
  and the Orphic *Lithica* 60
algae, chemical evidence for a warmer mid-Pliocene 141
alien science – how aliens from other planets might look 202
alkenones
  in reconstruction of ancient sea temperatures 140
  show higher concentrations of Pliocene atmospheric CO_2 142
alpine ecosystems, concern for in the Dolomites 163
Amaltheus subnodosus 150
amber 62
Americas, oldest American? 163, 166
amethyst 61
ammonites 150, 151
  Cambrian, crushing predation in 196
  Charmouth Mudstone Formation 149
  cited as Ophites (snakestone) 60
  schlotheimiid, Saltford Shale 148, *149*
amplitude, tsunami 65
Andaman Islands, and the 2004 tsunami 24
Andes
  salt flats of Bolivia 170–1
  salt springs in Peru 171–2
ANDREWS, P., News from New Zealand 92–3
Anglesey overturned 130–1
Angulata Biozone 148
animals, detect earthquake precursor vibrations 26
Anomalocaris 196
Antarctic Heritage Trust, controversial restoration and conservation plans 3
Antarctica, Dry Valleys basalts 21
anthoinite 35
Anti-Atlas mountains, Morocco
  Devonian habitats crossed by faults, some became vents 215
  rugosans in mud mounds 215, *216*
Aptyxiella 167
Arakiba Massif, cave of Krubera 13
archaeology, and religious history, Lough Erne 127
Arctic ice, feared to be melting 203–4
  complete loss of summer ice feared 203
  extent of sea ice lowest ever in 2005 203, *203*
  threats to wildlife in the region 203–4
Arctostrea carinatum 72
Ardoukoba massif 103
  eruptions 103
  recent fissure eruptions 105
Arsenikon (Orpiment) 59
Asal-Ghobbet graben 103
  fault movement still visible 105
  now most active zone 105
Asian Tsunami disaster, December 2004 22–6, 42
  African casualties 42
  the aftermath 25–6
  the disaster 24–5
  the earthquake 22–3
  the tsunami 23–4
Astroites (Starre-stones) 62–3, *63*
Aswan granite 110
Australia, prehistoric, and the destruction of big animals 123

Back Covers
  Dudley limestone mine (No. 4)
  Modro Jezero sinkhole (No. 5)
  Petra, sandstone colouring (No. 3)
  Pipeline over permafrost (No. 6)
  Santa Cruz, marine arch collapse (No. 2)
  Spitsbergen, alluvial fan (No. 1)
bacteria, chemosynthetic 74
Baginton Sand and Gravel 210
Baku-Tbilisi-Ceyhan oil pipe line, a saviour for the West? 122–3
BALDWIN, S., *Campi Phlegraei*, a further copy sold 13
Ballyknochan granite, problem with lower quality weathered stone 114
Barrettia Limestone *73*
Barrettia multilirata *73*
basalt
  Afar, Ardouka massif 103
  tholeiitic 54, 104
Bath Stone 7
bathtub sedimentology 136–7
bedding 116
bedrock, etched or altered 20
Beer and Branscombe cliffs, Devon 84, 88–9
  engineering work on cliffs to east of Beer 89
'belemnite battlefield', Dyrham Formation 150, *150*
Belfast, N. Ireland, an iceberg to remember *Titanic* 83
Berkeley Square, nature in, new carving 128
Bingham Canyon, Utah
  major expansion of the pit east face 212
  open-pit copper mine 211–12
biomolecular engineers, work to predict DNA of extinct Cretaceous mammals 4
Birdlip Limestone Formation 151
Birling Gap, Sussex, erosion problems for The National Trust 84
Bivalves (Fossils explained) 71–5
  at hydrothermal vents and cold seeps 74–5
  ecology and palaeoecology 72–3
    epifaunal bivalves 72
    infaunal bivalves 72, 73
  morphology 71–2
    adductor muscles 71
    articulation 71
    external growth lines 71–2, *72*, *73*
    pallial line 72, *72*
    umbo, in equivalve bivalves 71
  rudists – most aberrant bivalves 73–4
    shell forms, elevators, clingers and recumbents *73*, 74
    thrived in the Tethyan shallow-water carbonate environment 73–4
Black Hills anticline 132
Black Hills of South Dakota, Mammoth Site of Hot Springs 132–3
Black Reef Formation 216
blacktailed godwits under threat from Fens flooding! 82
blanket bog, Cuilcagh Mountain 15
Blue Lias Formation 45, 147
  'Blue Lias rings' walk 148
  Warwickshire, quarries yielded important fossils 147–8, *148*
bolide impacts, likelihood of coincidence with flood basalts 96
Bolivia, Salar de Uyuni 170–1
  flooded during summer season 170
  Isla de los Pescadores 171
  massive evaporation 170
  polygonal desiccation fractures 171, *171*
  salt dug by hand near Colchani village 171, *171*
  the salt hotel 171, *171*
Book reviews 38–40, 76–80, 117–20, 157–60, 197–200
Bradypus 232, 234, 235, 237
  related to Eutardigrada 235, *237*
Bridgwater plesiosaur 85–6
Briefing 2–10, 42–8, 82–9, 122–8, 162–6, 202–8
brine 153
  common as a fluid inclusion 156
brine springs 171
  Salinas, Peru 171–2
  used for spas or in industry 156
British Antarctic Survey 3
British Association, Exeter meeting 7
British Geological Survey (BGS) 7
  finished drilling close to North Pole (part of Integrated Ocean Drilling Program) 14
  new 1:50 000 geological map of the Isle of Man 172
    A4 format report 172–3
    folded map version 173
    illustrated booklet 173
  provision of policy advice on English minerals 52
The British Isles: A Natural History, TV series with Alan Titchmarsh 129
BROOKS, K.
  Greenland's shining future 69–71
  The Skaergaard intrusion: from icon to precious metal deposit 218–21
building stone collections 204–5
  best undoubtedly the Watson collection 204–5
  new collection, 'Geological Terrace', Russell-Cotes Museum, Bournemouth 2–5, *205*
building stone, Wembley Stone Show, London, 2005 206–7
  gabion-style baskets of graded pebbles (Turkish) *206*, 207
  limestone, texturally distressed tiles 207
  only two British operating quarries 206–7
  other British companies marketing imported stone 2
  polished stone, China 207
  sandstone flagging and block stone 207
  'slate', foreign, can it stand up to our weather? 207
Building stones explained 110–16
Bulkeley Hill Sandstone Formation 91
Burek, C., Emily Dix, palaeobotanist – a promising career cut short 144–5
Burma Microplate
  aftershocks due to relaxation of 22–3
  failure of caused Sumatra earthquake (December 2004) 22

CABE (Commission for Architecture and the Built Environment) 115, 116
Cadeby Formation 94, 94
calcium 34
calderas
  caldera, cauldron and ring structure 98–9, *98*
  La Garita Caldera 98
  Olympus Mons 98
  shape and size 99
  stages in development 99, *99*
Calymene 108–9
Camborne School of Mines 7
Canadian diamonds 69–70
Cape Verde Islands, work on ocean island volcanism 168–9
  Fogo, an archetypal volcano 168–9
  igneous activity concentrated in the west 168
  magma storage chambers very deep 168
  volcanoes produced by a hot spot 168
Caracoles Tuff 187, *188*
carbon dioxide levels
  and changing stomatal densities 141
  increases in, dramatic effects on global temperature and ice-volumes 143
  and mid-Pliocene global warming 142, 143
carbon sequestration, under the seabed 4
Carboniferous rocks
  coal measures contained regular sedimentary cycles 179
    marine layers contained conifer and cordaite pollen 179, *179*
  drought-adapted vegetation, Garnett, Kansas 178
  Northern Ireland 126, *126*
Carboniferous System, official names for 213–14
  details 213
  recently ratified global series and stage subdivisions *214*
  recently ratified global subdivision of *214*
  suggestions for usage to facilitate a smooth transition 213–14
Cardiff
  a new street guide 207–8
  wild animals of Castle Street 208
Cardium echinatum *73*
carnelian 61
Carrock Mine, Cumbria 36, 37
  altered wolframites 35
Castle-an Dinas Mine, Cornwall, wolframite 34
cataloguing, of collections 63
caving, in Mexico 127, 210
cegolites 61
CGMW *see* Commission of the Geological Map of the World
chalk/limestone (Galactitis) 60
Charmouth Formation 147, 149–50
  '70', '85' and '100' Marker members 147, 149
  Blockley Station Quarry 149
  Fenny Compton Railway Cuttings and gas pipeline trenches 149
  fossil-rich grey mudstones 149
  rich benthic fauna 149
Chelidonius, Swallow Stone 61
chemistry courses, university, proposed closures 4
Chikubetsu Formation, colonization strategies of organisms using a whale fall 57, 57
Chile, stability of Atacama desert 177, *177*
Chilmark Stone 43, 44–5
  disturbed bedding structures 44

Figures and Tables in *Italic*.

China
  discovery of 121 million-year-old baby bird 3–4
  mammals with an appetite for small dinosaurs 43
Chipping Norton Limestone
  Crosshands Quarry *151*, 152
  passes into nearshore Horsehay Sand Formation 152
Chlamys 194
chlorine, occurring as halite 153
Choloepus 232, 236, 237
The Churchill Barriers, Orkney Islands 91–2
  causeways linking the main islands 92, *92*
  labour provided by Italian prisoners of war 91–2
cinder cones, from submarine phreatic explosions, Ghoubbet 103
clams *see* Bivalves
classification, of rocks 94
clay lining of landfills 176
  circumstances of failure of 176
  provides an impermeable barrier 176
CLAYTON, G. *see* HECKEL, P., and CLAYTON, G.
cleavage 47
Cleopatra's Needle 111
cliff stabilization, to east of Beer 89
The climate of the future: clues from three million years ago 138–43
  checks and balances: chemical evidence from algae 141
  foraminifera: ancient oceanographers 139–40
  making models of the Pliocene world 142–3
  other evidence for Pliocene warmth: clues from fossil leaves 141
  transporting heat in the oceans 140–1
  what the mid-Pliocene might tell about the future 143
  a window on the Pliocene world 138–9
climate modelling, of the Pliocene world 142–3, *142–3*
  results show global annual average temperature 3 °C warmer 142, *143*
Close encounters of the comet kind 162
Clypeus Grit Member 151–2
  Crosshands Quarry, Little Compton 151, *151*
  transgressive, crosses Vale of Moreton Axis 151
Clypeus ploti 152
CO storage, British Government plans 4
coal industry, employed palynologists to help correlate coal seams 179
coastal erosion, problems faced by the National Trust 84–5
cold seeps, ancient, fossil bivalves found 75
Colditz (German POW camp), geology faced in tunnelling *17*, 18
collections, archaeological, geological and natural history 63
Colosseum
  could it have been flooded to stage naval battles: answer yes 164
  lacking stretches of wall 164
  Roman concrete in core structures 164
columbite-tantalite 35
comets, *Deep Impact* probe striking comet Tempel 1 162
Commission of the Geological Map of the World 16–17
  all geological surveys (or similar) are members 16
  first effort, first Geological Map of Europe 16
  framework for constructing maps very flexible 17
  an NGO eligible for UNESCO funding 16
  organization 16–17
  use of GIS (Geological Information System) 17
conifers
  first conifers possibly upland plants 179
  origin and evolution a mystery for palaeobotanists 178–9
continental flood basalts 95, 96, 102
Copper Coast Geopark, County Waterford 15
  Bunmahon Volcano and Kilfarrisey Volcano 15
  exposure of mid to upper Ordovician marine mudstones 15
coprolites 191
corals, new thoughts on 215, *216*
  coral banks in deep waters off Norway (late 1990s) 215
  reef bioherms 215, *215*
  rugose corals which may have been in deep water 215, *216*
Craidleith fossil tree (*Pitus withamii*) 181
Crazy Horse statue, South Dakota 49–50
  only head completed 49
  rock excavation by drill-and-blast 49
Cretaceous oceanic red beds (CORBs) 135–6
  in Bottacione section (Umbria–Marche basin) 136, *136*
  characterized by low sedimentation rates 136, *136*
  deposition of modern deep-sea red clays 136
  event horizons important in former Tethys 136, *136*
Cretaceous Park (cute and furry) 4
crushing predation, produces diagnostic patterns 194–6
  crabs 194, *195*
  repair of failed attempts 195–6, 196
    less common in bivalved organisms 195–6
    recognition of a size refuge 196
  stomatopods 194
Cyprus, geologically interesting sign 173

Dalbeattie Granodiorite 45
Dalol, Lake, surrounded by hot springs and fumaroles 106
Dalradian slaty greywackes 89
Danakil Alps 102, *102*, 106
Danakil Depression 101, 102–3
  Dalol Basin, evaporites 106
  and Erte Ale 106–7
Danakil Microplate 102
  current rotation appears to influence volcanic activity 105–6
  divergence zones either side 105
  moving independently of the Nubian Plate 104
  rotation of 105
Dartmouth Slates 86
The Day After Tomorrow (book/film), collapse of the Greenland ice sheet 50–1
De Lapidus, Marbode, Bishop of Rennes 60–1
De Mineralibus, Albertus Magnus, and the Doctrine of Form 61
De Naturum Fossilium, Agricola 62
De Rerum Fossilium, Lapidium et Gemmarum, Conrad Gesner 62
De Virtutibus Lapidum, Damigeron 59
Dead Sea Transform 55–6
  brittle fault deformation 57
  fault-related structures 56–7, 56
  a 'strong' fault 57
  strontium isotope ($^{87}Sr/^{86}Sr$) data 56, 57
  studies in the Arava Valley 56–7
Delabole Quarry 111
deltaic plain, of the Mississippi 225
Denmark, possible acquisition of new territory! 2
Derby earthquake (1904) 58, *58*
diamonds 59, 61, 69–71
  African, 'blood diamonds' 69
  at the Natural History Museum 167
    De Beers Millennium Star and Steinmetz Pink 167
  Canadian diamonds 69–70
  Greenland diamonds 70–1
dinosaurs
  diet 97–8
  discovery of embryo within its egg 163
  Falcarius utahensis, newly discovered 122
Dioscorides of Anazarba, writes on principle of sympathetic magic 59
Diplodocus carnegiei *100*
Disaster Monitoring Constellation (DMC), satellites to spot disasters 202
Diss Mere, origin 82
Dix, Emily, palaeobotanist – a promising career cut short 144–5
  Bedford College days 144–5
  a lasting legacy 145
  Swansea, university days 144
  war years 144
    and mental exhaustion 145
Djibouti 102
  grabens 103–4, 105
Dolomite Mountains, N. Italy, proposal to tax tourists 162
DONOVAN, S.K.
  Fossils explained: 50 not out 169–70
  see also HENSLEY, C., and DONOVAN, S.K.
DOYLE, P.
  England's heritage in stone 93–4
  Great escapes 17–18
  Rocks explained? 170
  The Churchill Barriers 91–2
drilling predation
  history 193–4
    increase in drill hole size from the Devonian 194
    increase onwards from early Cretaceous 194
  recognition of 191–3
    assessing intensity of 193
    modern drillers 192–3, *192*, *193*
    patterns of drill hole sterotypy 193, *194*
    recognizing different morphologies, diagnosing ichnotaxa 192
ducks, fossil 43
Dudley bug, the strange case of 108–9
  the bug escapes 108–9
  a bug starts a revolution 109
  campaign to reinstate the bug on the borough Coat of Arms 109
  other twists in the tale 109
  theft united media, specialists and public 108–9
Dudley Museum, Dudley Bug stolen from 108
DUFFIN, C.J., The western lapidary tradition in early geological literature: medicinal and magical minerals 58–63
dykes
  basaltic 105, *105*
  lamprophyre 87
  white aplite 50
Dyrham Formation 150
  Avon Hill Quarry, Avon Dasset, yielded many fossils 150
  Edgehill Quarry, belemnite 'battlefield' 150, *150*
  Napton on the Hill Brickworks 150, *150*
  shallower-water conditions 150

earliest mountain forests 178–81
  'Permian' plants in Carboniferous rocks 178–9
    highland flora of Carboniferous times? 178
  pollen rain from distant mountains 179–80
  pollen spikes in marine bands, amplified upland signal (Neves' Effect) 179–80
  tree trunks in ancient rivers 180–1
    Blanche Brook, remains of cordiate trees 180
    in Carboniferous times highland surrounded the basin's margin 180–1
  upland greening 181
    earliest evidence in mid-Carboniferous 181
    possibility of even older upland vegetation 181
earthquakes
  in the Afar 105
  along Dead Sea Transform 55–6
  Leicester and Derby (June–July 1904) 57–8, 210
  Lisbon (1755) 64
  Sumatra
    and the following tsunami 22–4
    predicted 83
  and tsunami 64
  world's largest since 1900 *25*
East African Rift 101
East Anglia, sacrifice of land to rising sea levels 2
East Greenland
  Blosseville Coast 54–5
  Kap Edvard Holm gabbro complex 218, 219
  Skaergaard intrusion 218–21
echinoids 19, 151, *151*
Egypt, use of granite for temples and obelisks 110
Encope tamiamiensis 19
engineering geology, importance of weathering fronts 19–20
England's heritage in stone 93–4
English Heritage, Fylingdales Moor prehistoric carving 53–4
English Nature, erosion problems at Birling Gap and Swanage 84–5
English Stone Forum 204
  aim the formation of 14, 93
environmental tipping points 203–4
equatorial regions, warmer in mid-Pliocene 141
Eremotherium 233, 235, *235*, 236
  right foot *237*
  skull *234*
Eremotherium laurillardi 235, *236*
Eritrea 102
Erte Ale shield volcano 106–7
  Afar's only currently active volcano 106
  caldera floored with fresh pahoehoe lava 106, *107*
  central vent a pit crater 107, *107*
  contains a lava lake 106
  example of a subaerial mid-ocean ridge volcano 106
  Hayla Gubbi 106
  zone of active sill and dyke intrusion beneath 106
Ethiopia 102
Ethiopian Highlands 101, 106
  earthquake zone 105
  geology 102
Etymologiarum, Saint Isodore, Bishop of Seville 60
Eurasia Plate 22
Europe, wolframite in 36
European Geoparks Network
  brainchild of Guy Martini and Nickolas Zouros 14
  Irish additions to 14–15
European Space Agency, and the DMC system 202
European Union, a bonus from the accession of Malta 124
Everest, Mount, shrinking 43
Exeter, new descriptive leaflet 7

extinctions, flood basalts and bolide impacts 96, *96*

facies developments, cyclicity and sediment thickness patterns, Jurassic, major controls on 146–7
FALCON-LANG, H.J., Earliest mountain forests 178–81
farallonite 35
fault system geometry and kinematics, in 3D seismic survey 175, *175*
faults/faulting
  bookshelf 105
  Charnwood Forest 57
  strike-slip 55–7
  Wirksworth 58
ferberite 33, 34, 36
  secondary 35
Fixing the imperial inch to the metre 212–13
flame-finishing, granite 112–13, 116
Fogo, Cape Verde Islands
  archetypal volcano 168–9
  central caldera and new cone 169
  geohazards 169
FOOKES, P.
  Comparing salaries 130
  Winchester Cathedral underpinned 18
foraminifera 90
  ancient oceanographers 139–40, *140*
    can be used to show tell-tale signs of ocean circulation 139
    skeleton, calcite or silica 139
  not Foraminiferida 90
FORD, T.
  Faujas de St Fond in Derbyshire 209–10
  More on the English Midland earthquakes 210
Forest Marble Formation 152
fossil leaves, evidence for Pliocene warmth 139, *139*, 141, 142
Fossils explained 71–5, 191–6, 232–8
  50 not out 169–70
    ideal article 170
    what next? 170
France, and the metric/decimal system 212–13
From the archive 57–8, 99–100, 217
Fuji, Mount (Hiroshige) 5
Fylingdales Moor prehistoric carving 53–4
  appears to be part of a larger feature 54

Gad Elu Obsidian 106
Gallimimus, a keratinous beak 97–8, *97*
garnets, size of 4–5
gas blow-out pipes, complex geometry revealed by 3D seismic mapping 175, *175*
gastropods, repair of 'peeling' damage by 195, *195*, 196
Geikie Plateau Formation 54–5
  stratigraphy and composition of lavas 55
Gemmarum et Lapidum Historia, Anselm Boetius de Boodt 62
Geodigest 19–21, 54–8, 95–100, 134–7, 174–7, 215–17
geodiversity audits 87–8
geological conservation, in Malta 124
the geological 'Hubble' 174–6
Geological Magazine, 1905 99–100
  comparison of soils 99
  contributions from Southern Africa 100
  dinosaurs 100
  an examination of bivalves 99
  Gebel Ahmar Sands, petrified forest and associated lavas 99–100
Geological Society
  2007 bicentenary, 'Royal' title for? 82
  accreditation of BSc in Petroleum Geoscience, University of the West Indies, Trinidad and Tobago 131–2
  Geoconservation Commission and formation of an English Stone Forum 93–4
Geologists' Association, South Wales Local Group, building stones of Cardiff guide 207–8
Geology Today
  1995, Nottingham's Hemlock Stone 166 in colour 166
Geoparks Network, European, Irish additions to 14–15
  Copper Coast Geopark 15
  Marble Arch Caves and Cuilcagh Mountain Park 15
geothermal energy, UK's first renewable energy model village 43
GIBBARD, P., The Quaternary, now you see it, now you don't 11–13
'The Glacial Boulders East of Cannock Chase' 217
glacio-isostasy, effects of in Scotland 68
global warming 138
  dangers of (perhaps) 50–1
  effects of in the Arctic 203–4
  evidence for mid-Pliocene warmer period 139–41
  in the geological past 14
Globigerina bulloides 139, *140*
Globigerina Limestone 124
Globigerina sacculifer 139
glossopetrae (shark's teeth) 60, 62
Glossotherium 235, 237
  mummified skin 235
  skull *238*
gold 61
  Skaergaard intrusion 218–21
  West Greenland 69, 70
gold panning, Victor Thurkettle 124
Gorsedd Circle, replacement by plastic pillars proposed 89
Grand Canyon, experimental floods 4
granite 110–16
  fitness for purpose 112–13
    flame-finished 112–13, *113*
    four-point flexural testing 112
    issues in large projects 112
    mineral breakdown can reduce strength 112
    slip resistance 112
    use in cladding 113
  good granite and bad 115–16
    American ASTM standards 115
    presence of anisotropy should be determined 115

  dry 42–3

RADLEY, J.D.
  Highlights of Jurassic Warwickshire 146–52
  Soft-rock conservation in action 210–11
Radyr Stone circle, Cathays Park, Cardiff 89, 208
Rae Craton, Canada 96
rare elements, found as inclusion in wolframite 34
Raumer, Karl von: pioneer of German military geology 182–6
  active service to victory at the Katzbach 184–5
  assigned to Blücher's army, reported to Gneisenau 184
  Katzbach, French army forced to withdraw 184–5
  tasked to carry dispatches by Gneisenau 184, 185, 186
  appointment as a military staff officer 183–4
  at headquarters 182, 183
  terrain evaluation expertise evolving in Prussian army 184
  trained with his men at Breslau 183
  appointments in Silesia 182–3

conclusions, a pioneer of German geology - but not military geology 186
geological journeys 182
influenced by Werner 182
Napoleon
compelled to withdraw back to France 183
Macdonald defeated at Katzbach 184–5
success against the Prussians 182
post-war years as a professor 185–6
Breslau: met Greenough, Buckland and Engelhardt 185
Erlangen: Professor of Natural History and Mineralogy 185–6
Professor at Halle 185
publication of *Geognostische Fragmente* 182
rest of the campaign 185
sent north taking control of sources of arms and ammunition 185
success in using prewar knowledge of terrain 185, 186
reclamation, should we turn back the reclamation clock 206, *206*
advantages of reversion of land to fenland 206
changes which spell problems for land drainage 206
possible use of set-aside to allow land to flood again 206
reduction in soil depth in the Fens 206
Red Sea, region of extension 55
Repenomamus, ate small dinosaurs 43
rift valleys, Djibouti 103, 103–4
ROBINSON, E.
A welcome score for palaeobotany 129–30
on Dr Anthony J. Sutcliffe 11
drilling close to the North Pole 14
on Professor George Walker, FRS 90
puzzle picture 52
Riding the waves 167–8
on 'snails lose their champion' (Professor John Evans) 209
Touchstone 13
rock crystal 61
rock salt 153, 156
Rocks explained, prospective authors sought for sister series 170
Roman concrete, use of volcanic ash for 164
Romaunt of the Rose, Chaucer's translation 61
ROSE, E.P.F., Karl von Raumer: pioneer of German military geology 182–6
ROSSI, P., Mapping the geology of our planet 16–17
Royal Albert Memorial Museum, Exeter, *Volcanoes, Deserts and Fossils* 7
Royal Geological Society of Cornwall, future of museum assets 2
Royal Society Summer Science exhibition
Oldest American 166
Pterosaurs and fighter planes 166–7
Touchdown on Titan 167
rubies 61
Rubislaw granite 111
rudists - most aberrant bivalves 73–4
Rugby Limestone Member 148, *148*, 149
Rushmore, Mount
George Washington in profile 49
heads of Washington and Roosevelt 49–50, *50*
Ryton Pools Country Park, geological information panel 211, *211*

Sagan/Zagan (German POW camp), geology found in tunnelling 17–18
St Erth SSSI site, important but degraded 88
Saint Fond, Faujas de
and the fresh water mussels of Loch Tay 48
important contributor to geological knowledge in Derbyshire 209–10
Derbyshire toadstone 209–10
visited localities round Buxton and Castleton 209
journey to Staffa 48
visited English coalfields to record the Industrial Revolution 48
St Mary's, Scilly Isles, tsunami deposits from the Lisbon earthquake 65, 65
salaries compared, Institute of Civil Engineers survey 130
Salisbury, unexpected geological bonuses 43–6
Caledonian granite and Variscan granodiorite 45
fossiliferous Palaeozoic limestone 45
salt
common name for halite 153
essential for herbivores 153
essential for human life 153
extraction and refinement 153
recently discovered salt 'factory', SE China 202
salt domes/diapirs 154
anhydrite cap rock can trap oil 156
formation by halo-kinesis 155–6
salt mines, cultural use for 2
salt pans, Lake Afrera 106
Saltford Shale Member 147
sedimentary cycles, fissile mudstones→calcareous units 149
still exposed in Southam Cement Works Quarry 148–9
sand smuggling 122
sandstone, Coal Measures, and the Tyne bridges 124–7
sanmartinite 33–4
sapphire 59, 62
Sardinian granites, problems with discolouration 114
satellite watch - to spot natural and human-made disasters 202
sauropod discovery, Isle of Wight 4
scallops, inequivalve 72, *73*
Scapa Flow, Orkney Islands 91
Scelidotherium 234, 237
scheelite 36, 37
wolfram frequently altered to 35
Schlotheimia 149
Scotland
Southern Uplands threatened with windfarms 122
The Underground City, Jules Verne 83–4
Scott, George Gilbert, use of Devonian grey-red marble 45
Scottish fishing fleet, the *Chrysolite* 46
Scottish Parliamentary buildings, using Kemnay Granite 111
sea surface temperatures 142–3
sediment, brought onshore by tsunami 64
sedimentology, bathtub 136–7
seeds, evolution in Late Devonian 181
seismic activity, and tsunami 64
selenite 59, 61–2
Sharp's Hill Formation 152
Sherwood Sandstone Group 91
shooting stars, Mars 123
from meteor shower produced by Wiseman–Skiff comet 123
Siberian craton, kimberlites 69
Siberian Traps 95
and mantle plume theory 96–7
silicification 99–100
Skaergaard Intrusion 54–5
gold discovered 69
Skaergaard Intrusion, from icon to precious metal deposit 218–21
example of igneous differentiation in a closed magma chamber 218
first prospects 218–19
discovery of marginal interest due to gold price 219
Platinova located source of gold anomalies 218–19
Platinova pulled out 219
the future 220–1
advent of tourist ships 221
formation of Skaergaard Minerals Corporation plc 220
problem of a low grade, high volume deposit 220–1
mineralogy 220
iron sulphides absent 220
main minerals typical of gabbros 220
PGE+Au phases 220
Platinova Reef associated with sulphur saturation 220
rocks above Triple Group impoverished in precious metals 220
sulphide immiscibility concept documented 220
tellurides 220
occurrence of precious metals 219
associated with macrorhythmic layering 219, *220*
Platinova Reef, sequence of precious metals 219
skaergaardite 220
Slave craton, kimberlites 69
slides, California
building on geologically dubious foundations 123–4
destroying property 123
Sloths (Fossils explained) 232–8
biology, behaviour and lifestyle 237–8
creators of giant burrows? 237–8
living sloths, 'an extreme tenacity to life' 237
living sloths, hair with blue-green algae growing in 237
living sloths, slow moving, sluggish, very slow metabolism 237
some exhibit sexual dimorphism 238
diet 238
conventionally regarded as herbivorous 238
evidence for true diet from fossil dung 238
diversity of fossil sloths 235–7
cladograms showing affinities of and between sloths 237
in the Holocene 233–4
locomotion and posture 235
morphology 234–5
forelimbs 235, *235*
hands 235
pelvis 235, *236*
skin 235
skulls 234, *234*
teeth 234
relatives and origins 232–3
belong to Xenarthra 232
recent discovery, Eocene sloth from Antarctica 233
traditionally regarded as American 233
which taxonomic name? 232–3
represented by two genera and six species 232, *232*
sloth stereotypes 232
SMITH, D., Tsunami: a research perspective 64–8
soft-rock conservation, Warwickshire 210–11
Wood Farm Quarry, use of a waterproof cover 210–11
Solena plagiaulax 72
Somalia 42, 102
SORKHABI, R.
Anniversary celebrations of four US magazines 52–3
E, the Environment Magazine (15 years) 53
Earth Island Journal (20 years) 53
Geotimes (50 years) 53
Science (125 years) 52–3
R&D budget 2005 in USA hits geosciences 90–1
South America, wolframite from 36
South Pole, USA plan to build a road to 2–3
South Stack Group 130, 131, *131*
Spain, slate from 207
Spearfish Shale 132
Speculum Lapidum, Camillus Leonardus, compilation from previous authors 62
Spiriferina 150
Spondylus spinosa 72
Sri Lanka, eastern, impact of the 2004 tsunami 23, 26
SSSIs 15, 88
Quaternary glacial gravels, preservation difficult 210–11
Start–Perranporth line 87
STILLMAN, C., Irish additions to the European Geoparks Network 14–15
stone cladding 116
Storegga Slide tsunami 65–8, 216
detailed side-scan and video exploration 216
fining-upwards sequences 67, *67*
radiocarbon dates for 67–8
sand layer from Shetlands to Firth of Forth 65–6, *66*
slides probably triggered by earthquakes 216
value as a marker horizon 68
storm surges 229–30, 231
stratigraphical record, tsunami in 65
stratigraphical studies and tsunami 68
stromatolites, Gwna Group *131*
Stromboli, returned to peaceful Strombolian mode 128
Stromness Flags 91
stuxites 62
Subcommission on Carboniferous Stratigraphy (SCCS), official subdivision of the Carboniferous System 213
subduction, of the India Plate 22
submarine canyons, turbidity currents and bathtub sedimentology 136–7
sulphide immiscibility concept 220
sulphide minerals, Voisey's Bay, Labrador 69–70
sulphur dioxide, emission of large quantities, Miyakejima volcano, Japan 134
Sumatra, and the Asian tsunami disaster 22–5, 64
Sunda Trench, marks India Plate boundary 22
Supervolcano (BBC film) 93
Swallow Stones 61
sylvite 154–5, 155
Synocnus 237

Tadcaster quarries 94, *94*
Tadjoura, Gulf of, earthquakes 105
Tangier, sand from beaches smuggled to Morocco 122
Tanzania, affected by the 2004 tsunami 42
tectonic subsidence 23, 24
Temple Bar (Wren)
classical triumphal arch 164–5
dismantled and rebuilt at entrance to Theobalds Park 165
now used in revitalization of Paternoster Square 165
Tendaho graben, southerly continuation 103–4
Terebratula 19
Thailand, impact of 2004 tsunami on Phuket 24, 25, 64
Thalassocnus 234, 235, 236

Thalassocnus carolomartini 236
Thalassocnus natans 236
Theophrastus, text on stones used for gem engraving 59
thermohaline circulation, Atlantic Ocean 140, 141
Thinobadistes 232
3D seismic surveying 174–6
  impact in the field of seismic stratigraphy 174–6
    discovery of gas blow-out pipes 175–6, *175*
    recognition of previously unknown architectural elements *174*, 175
    in structural analysis 175, *175*
    three-dimensionality of igneous systems observed *175*, 176
Thrussington Till 210
tidal waves *see* tsunami
tides, and the effect of tsunami 64–5
Titan
  Saturn's largest moon, Huygens probe landed 53
  Touchdown on Titan 167
toadstone 209–10
  a cure-all 62
Torreites sanchezi 73
touchstone (Lydian Stone) 13
  use in production and testing of coinage in W European mints 13
trace fossils 19, 163
Tragophylloceras 149
Transantarctic Mountains, probably mid-Pliocene, yield fossil southern beech plants 139, *139*
Transvaal Supergroup *216*
  hopper faces 216, *217*
  identification of halite casts in 216
  no associated gypsum 217
  other classic indications of desiccation 217
travertine towers, Lake Abhe 104
'travertines', Middle East, Mediterranean and peninsular Italy 207
Trigonia 167
Trigonia reticulata 72
tsunami
  caused by sea floor displacement 23
  the 'English Wave' (1607) 167–8
    earthquake shock as the source? 167–8
    no records for around 1607, any further evidence? 168
  a further panic in Asia 82–3
  Tsunami: a research perspective 64–8
    drawdown 65
    leading-depression or leading-positive waves 65
    origins and definition 64–5
    recent research 65
    the Storegga Slide tsunami 65–8
    stratigraphical studies and tsunami 68
  Tsunami disaster in Asia, December 2004 22–6
    destructiveness of 23
    losses magnified by loss of mangrove shield 42
    repeated warnings by Professor Kerry Sieh 42
    search for survivors on island of Nias 83
    world's most catastrophic 26
tsunami intensity scale 65, 65
tsunami run-up 64
tsunami warning systems 26
tungsten, discovery and uses 37
tungsten compounds 37
tungsten steel 37
Turkey, sandstone from 207
Tyne bridges, geology of 124–7
  abutments a matter of keying into the main sandstone 125
  debt owed to Coal Measures and Tyneside history 126–7
  East Coast main line railway bridge, avoided the problem channel 126
  girder Radheugh Bridge (replaced) 126
  High Level Bridge, avoided the problem channel 125
  new
    girder bridge carrying the Metro ring 126
    the meniscus Jubilee Bridge 126
  'New' Tyne Bridge, a trial run for the Sydney Harbour bridge 126
  Roman bridge 'lost' 125
  Scotswood 'Chain Bridge' (replaced) 126
  Swing Bridge, swinging from a mid-river island 125–6, *125*

UK, 1863, metrication bill, lost in the Lords 213
unconformities, mid-Triassic 91
uniformitarianism 138
Unio solandri 73
upland greening, shedding light on the enigma of 178–81
USA
  anniversary celebrations for four magazines 52–3
  Bingham Canyon, major expansion of the pit east face 211–12
  Black Hills of South Dakota 132–3
  California slide 123–4
  flooding of New Orleans 225–31

West Indies, petroleum geoscience in 131–2
Western lapidary tradition in early geological literature: medicinal and magical minerals 58–63
whale falls, Miocene 56, 57
whelks, predation by 196
Whitby Mudstone Formation 147
  poorly exposed 151
Wight, Isle of, large dinosaur disinterred 4
WILLIAMS, M. *see* HAYWOOD, A., and WILLIAMS, M.
Wilmcote Limestone Member, source of building, walling and paving stone 147
Wilmcote Quarry 147
Wilmslow Sandstone Formation 91
WILSON, B.
  Petroleum geoscience in the West Indies 131–2
  Volcanic Hazard Atlas of the Lesser Antilles 169
Winchester Cathedral underpinned 18
  cracks first reported in 1905 18
windfarms, threatening the Southern Uplands of Scotland 122
the Wirral Way, Cheshire 91
wolframium *see* tungsten
wolframine, refers to tungstite 33
wolframite series (Minerals explained) 33–7
  alteration of members 34–5
  chemistry 34
  colour differences 34
  curation 37
  discovery and origins 33–4
  discredited names 33
  genesis of 36
  look-alikes 35
  obtaining wolframite minerals 36
  structure 34
    twinning and cleavage 34
  uses of wolframite 36–7
Wollemi nobilis 129
Wollemi Pine 129–30
  arrival at Kew 82, 130
wombat theory, and the destruction of Australia's big animals 123
WOOD, M., Anglesey overturned 130–1
woodland, damp ash, Ireland 15
World Gold-panning Association 124
WORTON, G., The strange case of the Dudley Bug 108–9
Wreay Church and evolution 8–10
  church constructed and decorated by Sarah (daughter of John Losh) *8*, 9–10
  detailed carvings in the interior 9, 10
  'fern' windows in the apse 9, 10
  gargoyles 10, *10*
  grave slab decorated with a *Lepidodendron*? 10, *10*
  Literary and Philosophical Society, Newcastle 8–9
  Losh, James and William, friends of Humboldt 9
  pulpit, external markings of *Calamites* 10, *10*
Wren, Sir Christopher, fitting use for Temple Bar (arch) 164–5
Wren's Nest National Nature Reserve, discovery of Dudley Bug 109

'Xena': planet or asteroid 163–4
  larger than Pluto 163
  member of Kuiper Belt 164

Yellowstone National Park
  hot springs 222
  possible supervolcano eruption 93
York, 2005, conference on indigenous building stones of England 14
York Minster 93, 94
Yorkshire geology month 52

Zagros–Taurus convergence zone 55
Ziolkowski, Korczak 49
zircons, used in modern dating techniques 130
